Summary

Software Engineer with 4+ years of experience, focused on Python/FastAPI services for a developer-tools SaaS. Built payment and subscription logic (Cashfree, PayPal), GitHub App integrations, OAuth authentication, and documentation-generation workflows at Penify.dev, and LLM agent workflows that generate and run code in isolated sandboxes at BLACKBOX AI. Writes tested, concurrent Python and has full-stack depth in React and TypeScript.

Skills

Languages: Python, TypeScript, JavaScript, SQL
Backend & APIs: FastAPI, Pydantic, Node.js, REST APIs, Webhooks, OAuth 2.0, JWT
Data: PostgreSQL, MongoDB, Redis, Supabase, Prisma ORM, Alembic
AI & LLM: OpenAI API, Gemini API, Ollama, agent workflows, streaming responses
Testing & Delivery: pytest, Docker, GitHub Actions (CI/CD), Git, Vercel, Vercel Sandboxes
Frontend: React, Next.js, Tailwind CSS

Experience

BLACKBOX AI — *Full-Stack Engineer (Contract)* Nov 2025 – Dec 2025

- Built agent workflows for file generation, command execution, and status tracking, running LLM-generated projects inside isolated Vercel Sandboxes.
- Streamed LLM responses to clients and converted natural-language prompts into project files.
- Automated GitHub repository creation, sandbox-file synchronization, and Vercel production deployments; persisted project, conversation, execution, and deployment state in MongoDB.

Penify.dev — *Software Engineer (SDE-1 → SDE-2, promoted Feb 2025)* Jul 2023 – Oct 2025

- Built and maintained FastAPI endpoints and service-layer logic for repository workflows, user accounts, analytics, and Git-provider integrations.
- Implemented Cashfree and PayPal checkout flows, transaction validation, and repository-based subscription eligibility, integrated with the billing dashboard.
- Built GitHub App integrations for repository discovery, organization filtering, usage analytics, and documentation-generation requests.
- Extended documentation-generation workflows with TypeDoc integration, changelog generation, multi-language support, and architecture documentation.
- As SDE-1, built the React/TypeScript dashboard and Google/GitHub OAuth authentication flows before taking on backend API ownership as SDE-2.

Independent Web Development (Remote Clients) — *Front-End / Full-Stack Developer* Mar 2022 – Jun 2023

- Delivered custom web applications for remote clients, connecting React front ends to backend services and third-party APIs; owned requirements, testing, and deployment support.

ZinEdu Classes Pvt. Ltd. — *Front-End Developer* Aug 2021 – Feb 2022

- Built admin tools for an EdTech platform covering user management, attendance, and fee collection, with REST API, payment-workflow, and Excel/CSV/PDF reporting integrations.

Projects

Ollama Vox — Local macOS Voice Assistant · github.com/maadhav-codes/ollama-vox Apr 2026 – May 2026

Tech: Python, PySide6/Qt, Ollama, MLX Whisper, Kokoro TTS, pytest

- Designed a three-worker pipeline (speech recognition → LLM inference → text-to-speech) with bounded queues, cancellation, and configurable overflow handling, all running on-device.
- Wrote pytest suites covering audio, transcription, inference, speech synthesis, and pipeline behavior.

diff2commit — AI-Powered Git Commit CLI · github.com/maadhav-codes/diff2commit Oct 2025 – Nov 2025

Tech: Python, Git, Rich, Ollama, OpenAI-compatible APIs

- Built and packaged a Python CLI that generates Conventional Commit messages from staged diffs via local Ollama models or OpenAI-compatible endpoints.
- Added commit-message validation, diff-size limits, and staged-tree/HEAD consistency checks that block commits if repository state changes after review.

Education

Bengal College of Engineering & Technology — B.Tech, Information Technology · CGPA 8.2/10 Aug 2017 – Jul 2021
