Summary

Frontend Engineer with 4+ years of experience building production React and TypeScript applications for SaaS and EdTech products. Built the customer dashboard, authentication flows, payment interfaces, and Next.js marketing site for a developer-tools SaaS (Penify.dev), and a real-time AI workspace with streaming chat, a code explorer, terminal logs, and live previews (BLACKBOX AI). Comfortable working into FastAPI and Node.js backends to ship complete features.

Skills

Languages: TypeScript, JavaScript, HTML, CSS, Python, SQL
Frontend: React, Next.js, TanStack Query (React Query), Redux Toolkit, Zustand, Tailwind CSS, shadcn/ui
UI Engineering: Reusable components, responsive & mobile-first layouts, protected routing, streaming UIs
APIs & Auth: REST APIs, OAuth 2.0, JWT, Webhooks, Node.js, FastAPI
Tools & Delivery: Git, GitHub Actions (CI/CD), Vercel, Docker, Supabase

Experience

BLACKBOX AI — *Full-Stack Engineer (Contract)* Nov 2025 – Dec 2025

- Built the workspace interface for an AI application-generation platform that streamed LLM responses and turned natural-language prompts into project files.
- Connected chat, a code explorer, terminal logs, and live application previews in one workspace, with real-time status for agent file generation and command execution.
- Wired one-step GitHub repository creation and Vercel production deployment into the workspace.

Penify.dev — *Software Engineer (SDE-1 → SDE-2, promoted Feb 2025)* Jul 2023 – Oct 2025

- Developed the React/TypeScript dashboard and reusable components for repository management, documentation generation, job tracking, profiles, and API-key management.
- Implemented sign-up, password recovery, protected routes, and Google/GitHub OAuth authentication flows.
- Delivered payment-history, plan-upgrade, and coupon-redemption interfaces, plus Cashfree and PayPal checkout flows integrated with billing APIs.
- Built and maintained the responsive marketing website and product-tour pages with Next.js, TypeScript, and Tailwind CSS.
- As SDE-2, also built the FastAPI endpoints and GitHub App integrations behind dashboard features such as repository discovery, organization filtering, and usage analytics.

Independent Web Development (Remote Clients) — *Front-End / Full-Stack Developer* Mar 2022 – Jun 2023

- Built 30+ responsive web interfaces from design specifications using semantic HTML, CSS, and JavaScript, with mobile-first layouts and cross-browser testing.
- Developed React applications with reusable components, routing, state management, and API integrations; owned requirements, feedback iterations, and deployment for each client.

ZinEdu Classes Pvt. Ltd. — *Front-End Developer* Aug 2021 – Feb 2022

- Developed React interfaces for an EdTech platform: role-based dashboards, access-controlled routes, and learning workflows for classes, assignments, exams, and performance analytics.
- Built admin interfaces for user management, attendance, and fee collection, with REST API integration and Excel/CSV/PDF reporting.

Projects

Ollama Vox — Local macOS Voice Assistant · **github.com/maadhav-codes/ollama-vox** Apr 2026 – May 2026
Tech: Python, PySide6/Qt, Ollama, MLX Whisper, Kokoro TTS, pytest

- Built a native Qt menu-bar app showing model health, responses, and per-stage latency, kept responsive by a three-worker background pipeline for on-device speech recognition, LLM inference, and text-to-speech.

diff2commit — AI-Powered Git Commit CLI · **github.com/maadhav-codes/diff2commit** Oct 2025 – Nov 2025
Tech: Python, Git, Rich, Ollama, OpenAI-compatible APIs

- Built an interactive CLI that generates Conventional Commit messages from staged diffs, with review, editing, and regeneration before committing.

Education

Bengal College of Engineering & Technology — B.Tech, Information Technology · CGPA 8.2/10 Aug 2017 – Jul 2021
