Summary

Full-Stack Engineer with 4+ years shipping SaaS products in React/TypeScript and Python/FastAPI. At Penify.dev, promoted from SDE-1 to SDE-2 in 19 months; owned billing (Cashfree, PayPal), GitHub App integrations, OAuth, and the customer dashboard. At BLACKBOX AI, built the agent execution layer and workspace UI for a prompt-to-deployed-app product. Comfortable owning a feature from API and data model through UI to production.

Skills

Languages: TypeScript, JavaScript, Python, SQL
Frontend: React, Next.js, TanStack Query, Tailwind CSS, shadcn/ui, streaming UIs
Backend & APIs: FastAPI, Pydantic, Node.js, REST APIs, Webhooks, OAuth 2.0, JWT
Data: PostgreSQL, MongoDB
Integrations: GitHub Apps, Cashfree, PayPal, Vercel API, OpenAI-compatible APIs, Ollama
Testing & Delivery: pytest, Docker, Git, GitHub Actions, Vercel, Vercel Sandboxes

Experience

Independent AI Tooling Projects — *Self-directed* Jan 2026 – Present

- Building local-first AI tools in Python and TypeScript; see Projects.

BLACKBOX AI — *Full-Stack Engineer (Contract)* Nov 2025 – Dec 2025

- Built the agent execution layer for BLACKBOX's prompt-to-app product: LLM-generated files written and run inside isolated Vercel Sandboxes, with file-generation and command status streamed to the client.
- Shipped the React/TypeScript workspace UI: streaming chat, code explorer, terminal logs, and live app previews.
- Automated one-click GitHub repository creation and Vercel production deployment; persisted project, conversation, execution, and deployment state in MongoDB.

Penify.dev — *Software Engineer II (SDE-2)* Feb 2025 – Oct 2025

- Owned billing end to end: Cashfree and PayPal checkout, server-side transaction validation, and repository-based subscription eligibility in FastAPI, wired into the billing dashboard.
- Built GitHub App integrations for repository discovery, organization filtering, usage analytics, and triggering documentation-generation jobs.
- Designed FastAPI endpoints and service-layer logic for repositories, accounts, analytics, and Git providers; extended the docs engine with TypeDoc, changelogs, and multi-language support.

Software Engineer I (SDE-1) Jul 2023 – Jan 2025

- Built the React/TypeScript customer dashboard and shared component library: repository management, documentation jobs, job tracking, profiles, and API-key management.
- Implemented authentication: sign-up, password recovery, protected routes, and Google/GitHub OAuth.
- Shipped payment-history, plan-upgrade, and coupon flows, plus the Next.js/Tailwind marketing site and product tour.

Independent Web Development (Remote Clients) — *Front-End / Full-Stack Developer* Mar 2022 – Jun 2023

- Delivered custom websites and React web apps for remote clients, owning requirements, API integrations, feedback iterations, and deployment.

ZinEdu Classes Pvt. Ltd. — *Front-End Developer* Aug 2021 – Feb 2022

- Built role-based React dashboards (student, teacher, admin) for classes, exams, and analytics, plus admin tools for attendance and fees with CSV/PDF reporting.

Projects

Ollama Vox — Local macOS Voice Assistant · github.com/maadhav-codes/ollama-vox Apr 2026 – May 2026

Tech: Python, PySide6/Qt, Ollama, MLX Whisper, Kokoro TTS, pytest

- Built a fully on-device voice assistant (speech recognition → LLM → TTS) on a three-worker pipeline with bounded queues and cancellation that keeps the Qt UI responsive; pytest-tested with mocked audio hardware.

Anime Companion — Streaming AI Chat with Voice · github.com/maadhav-codes/anime-ai-companion Oct 2026

Tech: React 19, TypeScript, Vite, Tailwind CSS, Live2D, Gemini/Groq/Ollama APIs, Kokoro TTS

- Built a browser AI companion with token-streamed LLM chat, sentence-level TTS queuing for low-latency voice replies, switchable Gemini/Groq/Ollama providers, and LLM emotion tags driving Live2D expressions.

Education

Bengal College of Engineering & Technology — B.Tech, Information Technology · CGPA 8.2/10 Aug 2017 – Jul 2021
