Professional Summary

Full-Stack Engineer with 4+ years of software development experience, building SaaS products with React, TypeScript, and Python/FastAPI. Delivered payment workflows, GitHub App integrations, developer-documentation features, and AI application-generation tools, with ownership spanning frontend interfaces, backend APIs, and deployment.

Skills

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS
Frontend: React, Next.js, TanStack Query (React Query), Redux Toolkit, Zustand, Tailwind CSS, shadcn/ui
Backend & APIs: FastAPI, Node.js, Pydantic, REST APIs, OAuth 2.0, JWT, Webhooks, Prisma ORM, Alembic
Databases & Platforms: PostgreSQL, MongoDB, Redis, Supabase
AI & Developer Tools: LLM API Integration, Agent Workflows, OpenAI API, Gemini API, Ollama
Testing & Delivery: pytest, Docker, Git, GitHub Actions (CI/CD), Vercel, Vercel Sandboxes

Experience

BLACKBOX AI

Full Stack Engineer (Contract) Nov 2025 – Dec 2025

- Built an AI application-generation platform that streamed LLM responses and converted natural-language prompts into project files within isolated Vercel Sandboxes.
- Implemented agent workflows for file generation, command execution, and status tracking; connected chat, a code explorer, terminal logs, and live application previews in a unified workspace.
- Automated GitHub repository creation, sandbox-file synchronization, and Vercel production deployments; persisted project, conversation, execution, and deployment state in MongoDB.

Penify.dev

Software Engineer (SDE-2) Feb 2025 – Oct 2025

- Built and maintained FastAPI endpoints and service-layer logic for repository workflows, user accounts, analytics, and Git-provider integrations, extending ownership across the frontend and backend.
- Implemented Cashfree and PayPal checkout flows, transaction validation, and repository-based subscription eligibility; integrated billing APIs with dashboard workflows.
- Built GitHub App integrations for repository discovery, organization filtering, usage analytics, and documentation-generation requests.
- Extended developer-documentation workflows with TypeDoc integration, changelog generation, multi-language support, and architecture documentation.

Software Engineer (SDE-1) Jul 2023 – Jan 2025

- Developed the React/TypeScript dashboard and reusable components for repository management, documentation generation, job tracking, profiles, and API-key management.
- Implemented sign-up, password recovery, protected routes, and Google/GitHub OAuth authentication flows.
- Delivered payment-history, plan-upgrade, and coupon-redemption interfaces integrated with Cashfree APIs.
- Built and maintained the responsive marketing website using Next.js, TypeScript, and Tailwind CSS, with reusable components and product-tour pages.

Independent Web Development (Remote Clients)

Front-End / Full-Stack Developer Mar 2022 – Jun 2023

- Delivered custom websites and web applications for remote clients, managing requirements, implementation, testing, feedback iterations, and deployment support.
- Built 30+ responsive web interfaces from design specifications using semantic HTML, CSS, and JavaScript, with mobile-first layouts and cross-browser testing.
- Developed React applications with reusable components, routing, state management, and API integrations; connected interfaces with backend services and third-party integrations.

ZinEdu Classes Pvt. Ltd
Front-End Developer Aug 2021 – Feb 2022

- Developed React interfaces for an EdTech platform, including role-based dashboards, access-controlled routes, and learning workflows for classes, assignments, exams, and performance analytics.
- Built administration interfaces for user management, attendance, and fee collection; integrated REST APIs, payment workflows, and Excel/CSV/PDF reporting.

Projects

Ollama Vox — Local macOS Voice Assistant Apr 2026 – May 2026
github.com/maadhav-codes/ollama-vox

Tech: Python, PySide6/Qt, Ollama, MLX Whisper, Kokoro TTS, pytest

- Built a macOS menu-bar voice assistant with on-device speech recognition, LLM inference, and text-to-speech, keeping voice processing local.
- Designed a three-worker pipeline with bounded queues, cancellation, and configurable overflow handling to keep the interface responsive during audio processing and inference.
- Added a native Qt panel for model health, responses, and per-stage latency; wrote pytest tests for audio, transcription, inference, speech synthesis, and pipeline behavior.

diff2commit — AI-Powered Git Commit CLI Oct 2025 – Nov 2025
github.com/maadhav-codes/diff2commit

Tech: Python, Git, Rich, Ollama, OpenAI-compatible APIs

- Built and packaged a Python CLI that generates Conventional Commit messages from staged diffs, supporting interactive review, editing, regeneration, and automated commits.
- Integrated local Ollama models and remote OpenAI-compatible endpoints with configurable models, prompts, and timeouts.
- Implemented commit-message validation, diff-size limits, and staged-tree and HEAD consistency checks to prevent commits when repository state changes after review.

Education

Bengal College of Engineering & Technology Aug 2017 – Jul 2021
Bachelor of Technology (B.Tech), Information Technology
West Bengal, India | CGPA: 8.2
