Summary

Engineer with 4+ years of experience shipping production software end to end, including LLM applications, agent workflows, and third-party integrations (GitHub Apps, Vercel, payment gateways, OAuth). Spent 15 months as an independent developer working directly with clients, from scoping requirements through feedback iterations to deployment. Moves between React front ends, Python/FastAPI backends, and LLM APIs to get working systems into users' hands quickly.

Skills

AI & LLM: OpenAI API, Gemini API, Ollama, agent workflows, streaming responses, on-device inference (MLX Whisper, Kokoro TTS)
Integrations: GitHub Apps, Vercel, OAuth 2.0, JWT, Webhooks, Cashfree, PayPal, REST APIs
Backend & Data: Python, FastAPI, Pydantic, Node.js, PostgreSQL, MongoDB, Redis, Supabase
Frontend: TypeScript, React, Next.js, Tailwind CSS
Delivery: Docker, GitHub Actions (CI/CD), Vercel Sandboxes, pytest, Git

Experience

BLACKBOX AI — *Full-Stack Engineer (Contract)* Nov 2025 – Dec 2025

- Built an AI application-generation platform that turned natural-language prompts into running apps: streamed LLM output, generated project files, and executed commands in isolated Vercel Sandboxes.
- Implemented agent workflows with status tracking, surfaced through a unified workspace of chat, code explorer, terminal logs, and live previews.
- Automated the path to production: GitHub repository creation, sandbox-file sync, and Vercel deployments, with state persisted in MongoDB.

Penify.dev — *Software Engineer (SDE-1 → SDE-2, promoted Feb 2025)* Jul 2023 – Oct 2025

- Integrated external platforms into the product: GitHub App integrations for repository discovery, organization filtering, usage analytics, and documentation-generation requests.
- Implemented Cashfree and PayPal checkout, transaction validation, and repository-based subscription eligibility across FastAPI services and the billing dashboard.
- Built FastAPI endpoints and service-layer logic for repository workflows, user accounts, analytics, and Git-provider integrations.
- Extended developer-documentation workflows with TypeDoc integration, changelog generation, multi-language support, and architecture documentation.
- Developed the React/TypeScript dashboard and Google/GitHub OAuth flows (SDE-1) before expanding into backend ownership (SDE-2).

Independent Web Development (Remote Clients) — *Front-End / Full-Stack Developer* Mar 2022 – Jun 2023

- Worked directly with remote clients to scope requirements, build custom web applications, run feedback iterations, and support deployment.
- Integrated client applications with backend services and third-party APIs; delivered 30+ responsive interfaces from design specifications.

ZinEdu Classes Pvt. Ltd. — *Front-End Developer* Aug 2021 – Feb 2022

- Built role-based dashboards and admin tools for an EdTech platform, integrating REST APIs, payment workflows, and Excel/CSV/PDF reporting.

Projects

Ollama Vox — Local macOS Voice Assistant · github.com/maadhav-codes/ollama-vox Apr 2026 – May 2026
Tech: Python, PySide6/Qt, Ollama, MLX Whisper, Kokoro TTS, pytest

- Built a fully local voice assistant (speech recognition → LLM → text-to-speech) that keeps all voice processing on-device, with per-stage latency monitoring and pytest coverage across the pipeline.

diff2commit — AI-Powered Git Commit CLI · github.com/maadhav-codes/diff2commit Oct 2025 – Nov 2025
Tech: Python, Git, Rich, Ollama, OpenAI-compatible APIs

- Shipped a packaged CLI that works with local Ollama models or any OpenAI-compatible endpoint, with safety checks that block commits if repository state changes after review.

Education

Bengal College of Engineering & Technology — B.Tech, Information Technology · CGPA 8.2/10 Aug 2017 – Jul 2021
