Summary

Full-Stack Engineer with 4+ years of experience building SaaS products end to end with React, TypeScript, and Python/FastAPI. At Penify.dev, owned features from dashboard UI to API, including payments, GitHub App integrations, OAuth, and documentation generation. At BLACKBOX AI, built an AI application-generation platform that takes a prompt all the way to a deployed app.

Skills

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS
Frontend: React, Next.js, TanStack Query (React Query), Redux Toolkit, Zustand, Tailwind CSS, shadcn/ui
Backend & APIs: FastAPI, Node.js, Pydantic, REST APIs, OAuth 2.0, JWT, Webhooks, Prisma ORM, Alembic
Databases: PostgreSQL, MongoDB, Redis, Supabase
AI & LLM: OpenAI API, Gemini API, Ollama, agent workflows
Testing & Delivery: pytest, Docker, Git, GitHub Actions (CI/CD), Vercel, Vercel Sandboxes

Experience

BLACKBOX AI — *Full-Stack Engineer (Contract)* Nov 2025 – Dec 2025

- Built an AI application-generation platform that streamed LLM responses and converted natural-language prompts into project files inside isolated Vercel Sandboxes.
- Implemented agent workflows for file generation, command execution, and status tracking, and connected chat, a code explorer, terminal logs, and live previews in one workspace.
- Automated GitHub repository creation, sandbox-file synchronization, and Vercel production deployments; persisted project, conversation, execution, and deployment state in MongoDB.

Penify.dev — *Software Engineer (SDE-1 → SDE-2, promoted Feb 2025)* Jul 2023 – Oct 2025

- Built FastAPI endpoints and service-layer logic for repository workflows, user accounts, analytics, and Git-provider integrations.
- Implemented Cashfree and PayPal checkout, transaction validation, and repository-based subscription eligibility, plus the payment-history, plan-upgrade, and coupon-redemption UIs.
- Built GitHub App integrations for repository discovery, organization filtering, usage analytics, and documentation-generation requests.
- Developed the React/TypeScript dashboard and reusable components for repository management, documentation jobs, profiles, and API-key management, with Google/GitHub OAuth and protected routes.
- Extended documentation workflows with TypeDoc integration, changelog generation, and multi-language support; built the Next.js/Tailwind marketing site.

Independent Web Development (Remote Clients) — *Front-End / Full-Stack Developer* Mar 2022 – Jun 2023

- Delivered custom websites and web apps for remote clients, from requirements through testing, feedback iterations, and deployment support.
- Built 30+ responsive interfaces from design specs, and React applications integrated with backend services and third-party APIs.

ZinEdu Classes Pvt. Ltd. — *Front-End Developer* Aug 2021 – Feb 2022

- Developed React interfaces for an EdTech platform, including role-based dashboards and admin tools for users, attendance, and fees, with REST API, payment, and Excel/CSV/PDF reporting integrations.

Projects

Ollama Vox — Local macOS Voice Assistant · **github.com/maadhav-codes/ollama-vox** Apr 2026 – May 2026

Tech: Python, PySide6/Qt, Ollama, MLX Whisper, Kokoro TTS, pytest

- Built a macOS menu-bar voice assistant with on-device speech recognition, LLM inference, and text-to-speech, using a three-worker pipeline with bounded queues and cancellation to keep the Qt UI responsive.

diff2commit — AI-Powered Git Commit CLI · **github.com/maadhav-codes/diff2commit** Oct 2025 – Nov 2025

Tech: Python, Git, Rich, Ollama, OpenAI-compatible APIs

- Built and packaged a Python CLI that writes Conventional Commit messages from staged diffs using local or remote LLMs, with validation and repository-state consistency checks.

Education

Bengal College of Engineering & Technology — B.Tech, Information Technology · CGPA 8.2/10 Aug 2017 – Jul 2021
